RESEARCH INTERESTS

Probabilistic Graphical Models, Approximate Posterior Inference, Bayesian Nonparametric Statistics, Probabilistic Topic Modeling, Web Search and Information Retrieval, Natural Language Processing, Social Networks and Urban Human Computing, Learning-to-Rank, Word Embeddings, Deep Neural Networks

WORK EXPERIENCE

University of Essex, United Kingdom *(January 2020 - Present)*
School of Computer Science and Electronic Engineering
Lecturer in Computer Science and Artificial Intelligence (Teaching and Research)

University of Kent, United Kingdom *(December 2017 - December 2019)*
School of Computing, Medway
Lecturer in Computing (Teaching and Research)
Served as a Deputy Admissions Officer (2018–2019) (Medway)

Cardiff University, United Kingdom *(July 2015 - November 2017)*
School of Computer Science and Informatics
Research Associate (postdoctoral researcher) with Professor Steven Schockaert

The Chinese University of Hong Kong (CUHK) *(November 2014 - July 2015)*
Department of Systems Engineering and Engineering Management (SEEM)
Postdoctoral Fellow with Prof. Wai Lam at CUHK and research collaboration with Dr. Xing Xie at Microsoft Research Asia (MSRA)
Postdoctoral work was partly funded by Microsoft Research Asia (MSRA)

The Chinese University of Hong Kong (CUHK) *(August 2014 - October 2014)*
Department of Systems Engineering and Engineering Management (SEEM)
Research Assistant with Prof. Wai Lam and Prof. MENG, Mei Ling (Chairman and Professor, SEEM)

EDUCATION

The Chinese University of Hong Kong (CUHK) *(August 2009 - July 2014)*
Department of Systems Engineering and Engineering Management (SEEM)
PhD. in Information Systems
Thesis Title: Latent Probabilistic Topic Discovery for Text Documents Incorporating Segment Structure and Word Order

- Advisor: Prof. Wai Lam
- Areas of research: Web search and Information Retrieval, Topic Modeling
- Committee: Prof. MENG, Mei Ling (Former Chairman and Professor, SEEM), Professor CHENG, Chun Hung (Former Associate Professor, SEEM), Dr. Michael C.L. Chau (Associate Professor, School of Business, Faculty of Business and Economics, The University of Hong Kong)

Sikkim Manipal Institute of Technology (SMIT) (*September 2004-July 2008*)
Bachelor of Technology (B. Tech.) in Computer Science and Engineering (CSE)
Country: India

- Thesis Focus: Load Balancing and Scheduling in Cluster Computing
- Advisors: Prof. Mrinal Kanti Ghose (Head, CSE, SMIT), Fredi B. Zarolia (Information Technology Services, Tata Steel Limited, India)
- Co-Advisor: Dr. Marimuthu Muruganant (*Cantab.*), Research and Development Division, Tata Steel (currently Director at Steel Academics, Research and Consultancy Center (SARCC), Sydney, Australia)
- Other research topics studied: Natural Language Processing and Web search, Artificial Immune System
- My undergraduate thesis was awarded an **S** (*Superb!*) grade

Kerala Samajam Model School (KSMS) (*March 1989 - March 2003*)
Country: India

- Indian Certificate of Secondary Education (ICSE - 2001)
 - Percentage - 88.88%
 - Ranked Eighth in the entire school (*out of approximately 250 students*)
- Indian School Certificate (ISC - 2003)
 - Percentage - 82.00%
 - Ranked Fourth in the Science stream (*out of approximately 120 students*).
(*Missed out on the third spot by a score of 0.5*)

**PhD THESIS
EXAMINATIONS**

- External examiner - committee also included Professor Udo Kruschwitz, University of Essex (*currently Chair in Information Science at the University of Regensburg*)
 1. Student: Andrius Mudinas, Birkbeck, University of London
 2. Year: 2019
 3. Supervisors: Dr. Dell Zhang and Professor Mark Levene
- External Thesis Examiner - Sikkim Manipal University, India
 1. Student: Papri Ghosh
 2. Year: 2019
 3. Supervisors: Dr. Tejbanta Chingtham and Professor MK Ghose

INVITED TALKS

- Lectures in the Summer School at Peking University, Beijing (July – 2019). I was recently invited by the Department of Intelligent Computing and Sensing Laboratory at Peking University to deliver lectures in their summer school in Beijing, China. Nominations were first sent by the School of Computing, University of Kent to Peking University which included my name as the only junior academic staff followed by names of the senior academic members, i.e., senior lecturers to professors. Academics from other institutions in the UK and the EU had also sent their nominations. In the end, I was the **only academic** selected to deliver the lectures from the UK/EU region
- Digital Humanities Workshop, CHASE Group (October – 2018)
- BenevolentAI (October – 2018)
- Centre for Language and Linguistics, University of Kent (March – 2018). I delivered the talk along with Professor Alessandro Vinciarelli from the University of Glasgow
- Department of Computer Science and Information Systems, Birkbeck, University of London (March – 2018)
- School of Mathematics, Cardiff University (November – 2017)
- Department of Systems Engineering and Engineering Management, The Chinese University of Hong Kong, SEEM Seminar Series (December – 2017)
- Workshop talk: “Probabilistic Topic Models” at the School of Computer Science and Informatics, Cardiff University (June – 2017)

**REVIEWER
SERVICE**

Conferences

- Programme Committee Member:
 - ACS/IEEE International Conference on Computer Systems and Applications (AICCSA-2014)
 - Hawaii International Conference on System Sciences (HICSS-2015)
 - Russian Summer School in Information Retrieval (RussIR-2016)
 - World Wide Web Conference (WWW-2017, WWW-2018)
 - Special Interest Group on Information Retrieval (SIGIR-2017, SIGIR-2018, SIGIR-2019)

- Neural Networks - Elsevier
- Transactions on Asian Language Information Processing (TALIP)
- Transactions on Knowledge and Data Engineering (TKDE)

AWARDS AND ACHIEVE- MENTS

The Chinese University of Hong Kong

- Finalist in the ACM-Hong Kong Best Research Awards-2013 held at Hong Kong University of Science and Technology, Hong Kong. *Only two best research candidates from the entire Faculty of Engineering of CUHK were selected to represent the university in the final.* The event was organized by ACM (Hong Kong Chapter) and Microsoft Research Asia
- SIGIR-2013 Student Travel Award
- Student Volunteer at SIGIR-2013 (received registration fee waiver)
- ECIR-2013 Student Accommodation Grant offered by Yandex, Moscow
- Best paper award at Beijing-Hong Kong International Doctoral Forum-2011
- Department of Systems Engineering and Engineering Management Postgraduate Scholarship - 2009

Undergraduate and before

- Letter of Appreciation for excellent performance at Tata Steel R&D (India) - 2009
- Nominated for the prestigious Overseas Research Students Awards Scheme (ORSAS), University of London (*declined*) - 2009
- Featured in the Indian national news for my ThinkSearch algorithm - 2008. I was interviewed one-on-one by a journalist from a leading Indian national newspaper, "Hindustan Times". The interview was published on the front page of my city's newspaper
- Scored a GPA of 10/10 in the final semester during undergraduate study - 2008
- Best paper award at TechFest, Sikkim Manipal Institute of Technology - 2006
- Third prize in SUPW/Science Workshop, Kerala Samajam Model School - 2002
- Second prize in Rotary Club of Jamshedpur Computer Quiz - 2001
- Consolation prize in SUPW/Science Workshop, Kerala Samajam Model School - 2001
- Awarded at the Annual Academic Prize Night for scoring 90% and above in the respective courses in ICSE (Indian Certificate of Secondary Education - Year 10) examination - 2001
- Commendation certificates for an excellent academic record in each terminal examination - 1996-2000
- Ranked among top three in the entire school - 1996-2000
- Awarded at the Annual Academic Prize Night for an excellent academic track record in the entire year consistently from 1996 till 2000
- Third prize in Inter-School Academic Quiz, Kerala Samajam Model School - 2000
- First prize in Science Quiz, Kerala Samajam Model School - 1999
- Featured in the national news for securing the top rank in school - 1996. The newspaper carried a lengthy story about me when I stood first in the entire batch for the first time. What was so inspiring about the story was that I was just a below average student a year back
- Best student in Discipline in the entire year in Taekwondo - 1995
- Rewarded numerous times in Taekwondo championships, belt examination and camps

**RESEARCH
GRANTS HELD
AS PI**

Undergraduate Seed Research Grant: My undergraduate university awarded me an INR (Indian Rupees) 10,000 seed grant (as PI) to support my future research. The grant could be used to buy research equipment or for conference travel. The award was prestigious and very competitive in the sense that I was the only student in my batch of 120 computer science students to be awarded this seed funding based on my undergraduate research accomplishments in the final year of my undergraduate study. Quality of the research proposal followed by a consistent academic performance were also some of the criteria used to select the candidate.

**INVOLVEMENT
IN RESEARCH
GRANT
PROPOSALS**

I have contributed substantially towards two research grant proposals during my PhD study and postdoctoral work with my thesis advisor Prof. Wai Lam, who was the principal investigator in the projects. I was the investigator in these projects. Both proposals were accepted. The Microsoft Research grant was used solely to fund my postdoctoral research, and the RGC grant was used to support the research activities of my PhD research group.

- Proposal title: **Mining Time-Aware Urban Living Styles via Latent Semantic Concept Analysis**

Funding name: **Microsoft Research Asia Urban Informatics Research Fund, 2014**

Amount approved: USD 20,000

Tenure: 1 year

The content of this proposal was exclusively designed and written by me. I introduced a new dimension to the existing MSRA project called LifeSpec, which is available internally at MSRA. In particular, I added a temporal component when generating the urban human lifestyle patterns. To this end, I proposed an entirely new temporal model that improved upon the original urban human computing model proposed at MSRA. The proposed model improved upon the time and space complexities, quality of the urban patterns generated, handling the sparsity in the data and improving upon the quantitative tasks. I designed a non-parametric temporal graphical model and formulated the equations by myself. The two main challenges were technical formulations and the evaluation plans. I wrote the draft of the proposal with full technical details and the intuitions behind the model and how it could be useful to MSRA. Besides, I designed and prepared the slides to present the proposal to an audience from Microsoft Research, who came to judge all competing proposals. The committee applauded the idea and the model very much at the end of the presentation. The proposal cited my works which were published in the leading conferences to convince the committee that we were competent enough to accomplish the required research task within a year.

- Proposal title: **Social-Aware News Trend Discovery via Joint Detection of Latent Information Structure from News and Social Media Text Content**

Funding name: **HKRGC General Research Fund, 2014**

Amount approved: HKD 692,894

Completion date: 31-12-2017

The RGC funding is among the few colossal research aids given by the Hong Kong government to some of the best research proposals. In this proposal, I handled and crafted the complete draft of the model's technicalities. The central theme of the proposal was to learn hierarchical human living and mobility patterns using data obtained from the online social networks and apply the trained model to conduct event modeling and group recommendation. To this end, I designed the graphical model, the generative process and the mathematical formulations. I wrote the draft which included the technical details, related work, the evaluation

plan and the intuitions behind the model to convince the reviewers that the task and the proposed models are noteworthy and important enough to be funded.

TEACHING EXPERIENCE

University of Kent, Medway

1. CO334 - People and Computing (Module Convener)
2. CO547 - Agile Software Development and Security (Module Convener)
3. CO639 - Electronic Commerce
4. CO644 - Semantic Web

Students' feedback about my teaching:

Immediately sent by a student after my first lecture ever in Kent (Module CO639) to his tutor who is also a lecturer in the School of Computing at Medway: *"Afternoon mrs, I would just like to put in a small word of gratitude & say today's lecture felt very engaging, not saying that yours or XXX (other lecturer's name made confidential) aren't but, considering it was his (didn't get his name) first time lecturing here, he engaged well I believe - he ensured we understood what was briefed in the powerpoints and just made things easier. Perhaps it was today's topic, that made the teaching easier, I don't know but I just wanted you to pass my regards to him, I just felt more engaged than usual today... thank you"*.

This is what the tutor of the student had to say: *"Congratulations Shoaib! This feedback is from a student who never ever contacts me usually (and hes my tutee!) and has not really been engaging with several courses. We need to observe your teaching rather than the other way around, it seems :)"*

Another student from a different module that I taught next semester (Module CO334). It shows that I have maintained a good teaching track record:

"Hi, Shoaib, I am contacting you regarding my review of your teaching style. I really enjoy attending your lecture and prefer this approach to teaching, however, I feel sometimes it can go off topic. I enjoy sharing my opinion and having the class getting more involved gives the lecture a better atmosphere. Furthermore I think using videos makes it easier to write notes and is more informative than having 80+ slides to go through. I would love to see examples incorporated into this video to showcase what you're saying rather than having to see you draw. Thanks."

Another student from the same module as above:

"Dear Shoaib, Just wanted to say that as part of your People and Computing lecture on a Friday morning, I really do enjoy your teaching. You seem more charismatic than almost all of the other lecturers and I think the way you teach is engaging too. The only feedback i can give is not about you but is infact about the module being a little basic. I understand that you cannot change the stuff that has to be taught so maybe try and engage the class by creating interactive activities. I'm not too sure what other people in the class would think about it but I know it would help me become more awake as it is a Friday morning after all! Hope that can be of some help,"

This is what one mature student had to say about my teaching in CO639:

"Hi Shoaib, I wanted to let you know that I really enjoyed the assignment on cryptocurrencies. I really like your style of teaching. The idea of a discussion first gets you thinking and the slides afterwards cement it in your mind. The only negative I would

say is you ask too much if your teaching style is okay. I totally understand why you do this but it can be a little distracting. I think it would be better if you just rolled with it and if there was an issue I'm sure the students would let you know. I like you as a person and a lecturer and wish you all the best in the future."

The comment below shows that I have consistently maintained my innovative teaching methods in my second year as Lecturer. A final year student from the module Semantic Web that I am teaching in 2019.

"Hi Shoaib, Just wanted to say I loved the lecture today! And your methods have helped us a lot. Thank you! "

The Chinese University of Hong Kong

Introduction to Engineering - I (ENGG1100)

- Supervised students in designing and constructing a robotic car for automatic navigation
- Taught students about the basics of 3D printing and using SolidWorks

Information Systems Management (SEEM 3490)

- Delivered lectures on Information Security and Cryptography
- Conducted revision classes covering the entire syllabus before the final examination (*the most challenging part!*)
- Supervised student projects

Data Structures (CSC2100E/F)

- Delivered lectures on Computational Complexity, Pseudo-code writing, Searching and Sorting
- Formulated interesting assignment questions based on real-life problems
- Conducted revision classes covering the entire syllabus before the final examination (*again the most challenging part!*)
- Supervised student programming projects

Sikkim Manipal Institute of Technology

Data Structures - Functions and Pointers in C

- Organized student workshops covering all aspects of "Functions" and "Pointers" in the C programming language

RESEARCH CO-SUPERVISION

- **PhD students:** Liao Yi (CUHK) and Shelan Jeawak (Cardiff University) - I can be best described as a "technical advisor" to them. My responsibility is to help them in mathematical modeling, scientific programming and experiment design with various analyses. With Yi, I have published papers in conferences such as AIRS and ICTIR.
- **Masters (MPhil):** Sam Lai (CUHK) - I have supervised Sam for a year and have taught him about data analysis and crawling for the online social networks. I have also trained him in probabilistic topic modeling programming in Java. He has successfully defended his MPhil thesis recently, and subsequently he will take the role of a research assistant in my PhD thesis supervisor's group. We have jointly published a paper in a flagship information retrieval conference recently (SIGIR).

CURRENT RESEARCH SUPERVISION

- **PhD students:** António Correia (visiting student), Ph.D. candidate in Computer Science at University of Trás-os-Montes e Alto Douro, Vila Real, Portugal
Researcher at INESC TEC, Porto, Portugal

COLLEGIABILITY

- **CO320: Introduction to Object-Oriented Programming** Took over Java tutorial classes for the undergraduate students; covered on behalf of a staff who abruptly resigned leaving no one to cover the required tutorials. (University of Kent in 2019)
- **CO334: People and Computing** Took over the lectures for the staff who was off work due to paternity reasons. (University of Kent in 2018)
- **CO600: Final-year Undergraduate Major Projects** Supervised a group because the main supervisor went on a sabbatical leave. (University of Kent in 2018)
- **Admissions Officer** Took over the main undergraduate responsibility because the admissions officer was offered the Head of School role. (University of Kent in 2018)
- **New Lecturer interviews** Took the responsibility on a very short notice of taking care of the applicants who visited the campus for the new Lecturer interviews. (University of Kent in 2018)
- **Examination script marking** Marked final-year written undergraduate examination answer scripts on behalf of an academic staff who suddenly took leave. (University of Kent in 2018 and 2019)
- **Data Science group logo design** Took the responsibility for designing the group's logo. (University of Kent in 2018)

PROFESSIONAL EXPERIENCE

Tata Steel Limited, Jamshedpur, India

Intern at the Research and Development Division (R&D) *January 2008 - June 2009*

- Designed, developed and deployed the CPU load balancing architecture for the Linux cluster
- Designed, developed and deployed a multi-threaded local Intranet crawler
- Designed and developed the “document-streaming” algorithm
- Estimation of yield-point from hot-strip mill data
- Drafted a detailed technical report on text classifiers

Tata Steel Limited, Jamshedpur, India

Intern at the Automation Division

July 2007 - August 2007

- Used Data Mining to come up with the relationship between steel casting parameters and the billet caster

GRADUATE COURSES UNDERTAKEN

- Techniques for Data Mining (CSC 5180)
- Text Mining Models & Applications (SEG 5680)
- Advanced Database & Information Systems (SEG 5010)
- Knowledge Systems (SEEM 5470)
- Logistics & Transport Planning (SEEM 5600)

PROFESSIONAL TRAINING

- Postgraduate Certificate for Higher Education programme (PGCHE) - Two compulsory and two optional modules completed thereby fulfilling the requirements for the PGCHE. *Out of the four assignments so far, I have obtained a DISTINCTION in three and a PASS in the other.*
- Communication Skills Training
- Teaching Assistant Training

SERVICES AND PARTICIPATION University of Kent

- Mentored three students at ACL-2019
- Data Science group web page and blog maintainer
- Undergraduate admissions work which includes participation in Open Days (usually Saturdays), Applicant Days, Undergraduate interviews, Ad-hoc undergraduate interviews, admission meetings, undergraduate campus tours, UCAS online applications processing, processing undergraduate student applicant day invitations - *This is a major duty and the most important administration work in the school. I continued to maintain a strong teaching and research track records despite taking up this time consuming role*
- Participated in organizing the new faculty recruitment
- Session Chair at AAAI-2019 (Robotics Track)
- Panel member in student plagiarism hearing
- Helping the university with student campus recruitment
- Panel member in Medway disciplinary committee

Conference Organization Experience

- “Board of members for Conference Programme editorial”, Thermec’2013, Las Vegas, Dec. 2 to 6, 2013
- Organizing Chair, Beijing-Hong Kong International Doctoral Forum (2011)
- Technical Paper Reviewer, Beijing-Hong Kong International Doctoral Forum (2010-2011)

Other Services

- University Open Day planning, organization and execution (CUHK)
- Student Volunteer at the 2014 Big Data Workshop jointly organized by KAIST-Microsoft Research Collaboration Center (KMCC), Korea; Department of Computer Science, Korea Advanced Institute of Science and Technology; the Key Lab of High Confidence Software Technologies (CUHK Sub-Lab), Ministry of Education, China; and the Department of Systems Engineering and Engineering Management, The Chinese University of Hong Kong (SEEM-CUHK) from April 22-23, 2014
- Constituted a Special Interest Group (SIG) in information retrieval at SMIT
- Regularly assisted the computer laboratory in-charge with hardware and software maintenance at SMIT
- Active member of the students’ technical body, ACCESS at SMIT
- Performed several social services such as teaching computers to backward people in India
- Lifetime member of the Numismatics Club of Jamshedpur, India
- An active participant in debates, spelling contests, etc

PROGRAMMING SKILLS Programming and Scripting Languages

- C, C++, MATLAB, R, Python
- SED, AWK, PERL, Linux Shell Scripting

Productivity Applications

- L^AT_EX 2_ε, MS Office, Libreoffice, Vim

Operating Systems

- Linux and its variants, Microsoft Windows, Sun Solaris

A Note on the University of Kent’s Internal REF Process

Last year, the Director of Research at the University of Kent, requested all research and teaching staff to submit five best papers published after January 2014 which would go through the internal REF process. The process was entitled “REF Exercise Winter 2018”. The goal of the process was to score the work as if it were submitted to the computer science REF panel.

Each paper was examined by three panel members and were ranked to a granularity of 0.25. The median rank was then taken, and some papers were also sent to the external evaluators which were double weighted. I submitted the following five papers in the internal REF.

1. Zied Bouraoui, **Shoaib Jameel**, and Steven Schockaert. 2018. *Relation Induction in Word Embeddings Revisited*. In the 27th International Conference on Computational Linguistics (COLING), pp. 1627–1637. Santa Fe, New Mexico. (Nominated as “Area Chair Favourites”)
2. **Shoaib Jameel**, Zied Bouraoui and Steven Schockaert. 2018. *Unsupervised Learning of Distributional Relation Vectors*. In the 56th Annual Meeting of the Association for Computational Linguistics (ACL), pp. 23–33. Melbourne, Australia.
3. **Shoaib Jameel**, Zied Bouraoui, and Steven Schockaert. 2017. *MEMBER: Max-Margin Based Embeddings for Entity Retrieval*. In the 40th International ACM SIGIR Conference on Research and Development in Information Retrieval (SIGIR), pp. 783–792, Tokyo, Japan.
4. Zied Bouraoui, **Shoaib Jameel**, and Steven Schockaert. 2017. *Inductive Reasoning about Ontologies Using Conceptual Spaces*. In Proceedings of the 31st AAAI Conference on Artificial Intelligence (AAAI), pp. 4364–4370, San Francisco, California, USA.
5. Lidong Bing, Wai Lam, Tak-Lam Wong, and **Shoaib Jameel**. 2015. *Web Query Reformulation via Joint Modeling of Latent Topic Dependency and Term Context*. In ACM Transactions on Information Systems (TOIS). Volume 33, Issue 2.

The outcome was that **all** the above five papers passed the internal REF exercise, which means that the school can consider them for the final REF submission in the computer science REF panel.
